

ALL ABOUT

BUSINESS INCUBATORS

unionriverinnovation.com

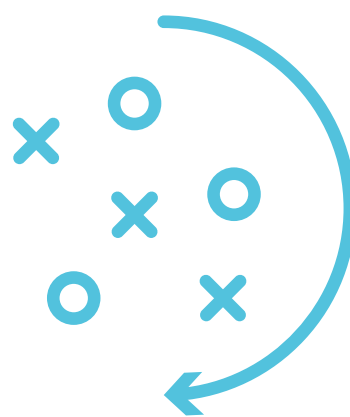

WHAT IS AN INCUBATOR?

An incubator is a space, either virtual or in-person, where entrepreneurs can interact with a community of like-minded professionals and access vital business resources to grow their startup.

BUSINESS COACHING

The Union River Center for Innovation Incubator Program connects entrepreneurs with business experts to coach them to build or improve their leadership, finance, and marketing skills.

OFFICE & LAB SPACE

Don't worry about finding office, conference room, or lab space -- our incubator has it all! Dedicated office spaces and lab areas allow you to focus on your business operations and product development.

BUSINESS SERVICES

We'll take care of the printing, mailing, and reception for you! Our business incubator allows you to manage your business with the extra help of provided business services, like reception services, conference room space, and more.

NETWORKING

Meet like-minded entrepreneurs and connect with potential partners, customers, and even funding opportunities through URCI's wide network of business connections and resources, all available through the incubator program.
